# WHY CHOOSE A LUXURY COMPOSITE DOOR?

A composite door is designed with a wealth of practical benefits in mind to ensure an entrance that will last many years and perform to the highest of standards. When it comes to choosing your door we pride ourselves on being able to offer the very latest styles, colours and enhancements to each of our doorsets. So what can we offer?

## **Good looks that stand the test of time**

- Our modern materials ensure a door that will look good for years to come.
- Each door is made from a GRP outer skin that only requires the occasional wipe with a damp cloth.

## **Enhanced security**

- Multi point Locks are fitted as standard for total peace of mind.
- Durable outer GRP skin provides a durable barrier.
- Proven to PAS 24 security standard, essential for achieving the endorsement of secured by design.

## **Good looks that stand the test of time**

Our door exceeds approved Document L of the Building Regulations requirements.

## **Weatherproof**

- Our doors keep the elements firmly shut outside and keep you safe and warm inside.
- Weather performance proven to BS6375-1 Classification, for weather tightness, air, wind and water.

## **Designed for a peaceful life**

- A high performance insulated core reduces unwanted external noise.
- The doors meet at least Outdoor - Indoor Transmission Class (OITC): 26db.
- At least Sound Transmission Class (STC): 29db.

## **Quality materials**

- Every door is an impressive 44mm thick and made from highly durable materials.
- Due to their construction they will not warp or bow like some timber doors.

# IMPOSING GREAT LOOKS

A young man and woman are smiling and standing together in a modern interior. The man is wearing a dark blue cardigan and the woman is wearing a bright pink sweater. They are positioned next to a dark-framed glass door or partition. The glass features decorative elements, including a vertical metal handle and diagonal lines. The background is a bright, out-of-focus interior space.

DECORATIVE  
GLASS

'Aurora' is a contemporary satin design with clear sweeping lines. Its elliptical shape offers a very smart and unique look.

Deeply carved rings refract the light with stunning effect. Unlike traditional bullions these opulent grooves are encapsulated within the insulated glass unit for ease of cleaning.

An extremely popular option 'Cameo' is a triple glazed decorative panel featuring crystal cut glass bevels. Backing textures have been carefully selected to compliment well some of the most popular backing glasses used in side panels or top lights.

This Abstract design is very simple yet extremely effective. Offset diamond clear crystal cut bevels, framed with zinc came are surrounded with a stipple textured glass. The stipple finish again lends itself well to be complimented with stipple sidelights or top lights when required.

Strikingly modern the 'Crescent' is a bespoke model which combines an etched finish with a graduated clear motif. The design is encapsulated within the insulated unit to ensure its good looks are well protected for many years to come.

A classic bevel cluster which refracts light beautifully. This crystal cut effect runs throughout most of the length of the panel creating a dramatic finish. The bevels are laced with an embossed texture to offer moderate levels of privacy.

'Daventry' uses new ground-breaking patented decorative glass technology to replicate ornate and detailed cut glass. Each design has a fused glass tile as a centrepiece with the overall design being heavily embossed to provide high levels of privacy.

This linear design combining a satin effect backing glass and clear lines offers a look of the utmost sophistication. Visually this style is very clean and crisp.

This well-known design is simple and elegant working very well both in traditional and contemporary properties. As with the 'Deco' model this glass combines a satin effect backing with clear dividing lines.

A clear starburst centre piece graces this refined classic frosted design which is encompassed within a clean outer border.

## Glacier

This much-loved option offers obscurity through its frosted centre yet the ability to easily view out of the home through the clear outer border.

## Grace

This lavish triple glazed bevel cluster features crystal cut glue chip bevels, zinc came and a hammered effect backing glass. It is a real statement piece and available in most door options.

## Ice

'Ice' is another exclusive decorative glass that is only available here. Three large diamond bevels are surrounded by a highly detailed pencil border. The design will shimmer and refract in natural light to offer a highly desirable look.

## Infinity

This fused tile effect has become increasingly popular over recent years but is not often combined with a triple glazed panel. The black tile effect motif is combined with black came and a stipple backing glass all encapsulated between two panes of flat toughened safety glass.

## Knightsbridge

Another design that uses our patented glass technology 'Knightsbridge' features a graceful clear centre bevel cluster with a highly obscure backing texture. This option is understated yet particularly stylish.

## Matrix

'Matrix' is a bold modern glazing with a satin / etch effect backing glass and dramatic intersecting clear lines. It is a perfect choice for those loving the contemporary lifestyle.

## Midnight

Available just in our modern long door 'Midnight' has a detailed etched backing design embellished with thick high-quality kiln formed black tiles. Sleek, modern and a real asset to any home.

## Milan

This triple glazed model couples' clear geometric bevels with a distinctive reeded backing texture. Instantly recognisable from its contemporary looks 'Milan' really offers something special for those wanting to stand out from the crowd.

## Nordic

This very clean option has a brilliant-cut bevel to its outer face with a very smooth sandblasted surrounding backing glass. The sandblast highlights particularly well the deeply grooved clear channels.

## Oasis

A wonderful traditional stained-glass design with the modern twist of being triple glazed. This vibrant model combines colourful antique look cut glass with aged black came. Ideal for period and character properties.

DECORATIVE  
GLASS

DECORATIVE  
GLASS

## Orb

A very detailed design with satin effect backing glass, clear lines and crystal cut square bevels which sit proud to the external face of the glass. This option is currently just available in our dual glazed door.

## Paris

The 'Paris' is a very luxurious cut bevel design with many intricate bevels forming an extremely impressive overall cluster. At the very heart of the design is a brilliant cut star.

## Saturn

A real one-of-a-kind design with three curved clear lines within the etched background. 'Saturn' has a modern look and offers real curb appeal.

## Sphere

'Sphere' provides great individuality and style with its bespoke look. Abstract spheres and crisp clear lines achieve a desirable look which is truly unique.

## Sycamore

This age-old classic combines a well-known central bevel cluster, zinc came and glue chip. In addition, a stipple backing texture provides a great contrast to the elliptical sections. The panel is triple glazed.

## Tate

Triple glazed decorative design at its very best! Black came, cut hammered and stipple backing textures give a lovely, graceful look. Due to high demand this choice is featured in most door styles.

## Triline

Ultra-modern triple glazing with amazing laser cut polished stainless-steel inserts. 'Triline' is a real showstopper and is aesthetically stunning. A 'must see' product.

## Trio Diamond

A classic by design 'Trio Diamond' is characterised by its distinctive diamond cut bevels with brilliant cut starbursts to their centre. Triple glazed with zinc came and glue chip backing.

## Westminster

An original bevel cut cluster with a variety of embossed backing films has a kiln formed tile as its centrepiece. The most popular glass tiles have a black and clear finish, but other colour options are available upon request.

To maintain the good looks of any grade of stainless-steel handle or accessory routine maintenance is required. A care label is securely fastened to each handle and should be left as information for the homeowner after insulation. Cleaning kits and greater detail on maintenance are available on request. We recommend a maintenance guide is provided to all fitters and end users with any sale.
